**Compsee's PowerTrack Construction Solution  
Accepted into Viewpoint Construction Software's New  
Development Partner Program**

***GIG HARBOR, WA — August 2010***

Compsee, a division of Control Solutions, Inc., a total solutions provider that designs, integrates and supports end-to-end mobility solutions, today announced that their PowerTrack Construction Solution has been accepted into the development partner program for Viewpoint Construction Software. Through the partner program, Compsee will work to create a stronger alliance with Viewpoint to deliver to their customer an effective and comprehensive mobility solution that extends the power of Viewpoint V6 Software.

Compsee's PowerTrack Construction has led the market for field data collection in the construction and shipbuilding industries, leveraging rugged mobile terminals and cellular data network growth, to help companies automate their daily reporting requirements. PowerTrack's solution automates the reporting required from field supervisors for labor, equipment, production and materials. The timeliness and accuracy derived from real-time data collection streamlines operations and boosts productivity, "The sophistication of the Viewpoint Construction Software product and their users match the segment of the market that PowerTrack addresses. Our mutual customers will benefit from the shared technical knowledge resulting from this collaborative environment," said Mike Kapp, Compsee SVP Marketing. "We're very excited about the synergy and opportunities we can create together through this partnership," says Dianne Kaiel, Program Marketing Manager at Viewpoint.

**About Compsee**

Compsee, a division of Control Solutions, Inc., is a leader in the application of automated data collection technologies and mobility solutions. Compsee offers a comprehensive range of planning and integration services, including wireless network design and consulting services. With corporate offices in Gig Harbor, Washington, Compsee has its sales headquarters in Melbourne, Florida, and sales offices throughout the United States. ## **About Viewpoint Construction Software**

With a long-standing focus on meeting the information needs of mid to large-scale organizations, Viewpoint has achieved a leadership position in construction enterprise software. Built on a contemporary and scalable Microsoft .Net platform, the firm provides construction-specific solutions that address the unique needs of leading firms throughout the U.S., Canada and Australia. Viewpoint works closely with its customers to gain specific insights necessary to evolve the software as industry conditions change. The result is software that is built to adapt and scale as customers' business needs grow and change. Most importantly, it means providing an information platform as rock-solid as the foundations our customers build their roads, bridges and buildings upon.
